The customer is responsible to have a cut off valve at the meter on their side of the meter in order to turn the meter off. The District's cut off valve is not to be used by the customer to turn the meter off.

The meter and line must be assessable to Southwest Fannin S.U.D. The customer is not allowed to lock the District out of the property. The meter area should also be kept clean.

If a service technician is called out after hours due to a problem on the customer's side a \$100 service charge will be added to your bill.

District policy and state rules allow for one (1) meter per house or business. Each business or house (any size) must have a separate meter. Sub-metering or multi-connections is prohibited without evaluation and prior approval from the District.
